

July 2010

News from Bauporte

If you are an architect, contractor or specifier with responsibility for sourcing the highest quality entrances and revolving doors, we'd like to keep in touch. We hope you find these quarterly updates useful and informative!

Latest News

New London Office

In May, Bauporte UK moved its operations to London. As UK General Manager David Bunkall explains, "The move made sense because it's where most of our UK projects and clients are located. So now all sales, project management and company administration operates out of our commercial office at Hamilton House, not far from St Pancras." See below for full contact details of the new office.

Latest website updates

Since the launch of our international website www.bauporte.com in 2009, the site has undergone a number of improvements to the navigation.

There are also new product sheets and [case studies of UK and overseas projects](#) on the site, showcasing Bauporte workmanship and high-profile commissions. We recommend you take a look at these to get a feel for our expertise and world-class credentials.

Did You Know?

Bauporte Doors UK also offers **service and maintenance on other manufacturers' door equipment, not just its own**. So if your clients are looking for a superior service contract on an existing installation, do get in touch for a competitive quotation.

Bauporte Design Entrances BV and its sales and manufacturing subsidiaries specialise in the design, manufacture, installation and service of bespoke revolving doors and entrances around the world.

Featured Project

Bespoke 4m high Revolving and Pass Doors, Watermark Place, London

Designed by Fletcher Priest Architects, Watermark Place is an award-winning, mixed-use commercial development completed in September 2009.

Bauporte Doors UK Ltd designed, manufactured and installed 3 fully automatic Circular Full Vision CFV2800AY revolving doors and 2 matching height automatic swing doors with in-ground drive units. Each 3-wing revolving doorset has a diameter of 2800mm and a turning height of over 3800mm.
